VALERIE	€45.00			BIKINI	€85.00
SY VESSEL	€45.00			MILEWO	€85.00
OTHER	€47.50			TRISEM	€85.00

If you have sown a mixture of varieties, please return the quantity of each variety sown separately. If you harvested a mixture of varieties and saved it for seed, declare the quantity of seed sown in the original ratio the varieties were sown in together for the first time. This is to ensure all plant breeders get their fair share of monies paid.

Hybrid Varieties – F1 hybrid varieties cannot legally be used as farm saved seed without the breeder's consent, regardless of end use.

Seed for a cover crop must be declared – Although not harvested, a farm-saved seed payment is still due once the crop has been sown.

Farm-saved seed payments become due at the point of sowing and all FSS use must be declared on time, regardless of the outcome or use of the crop. **The quantity of seed sown is the basis for payment** – seeding rate is irrelevant. **FSS rules apply whether chemical plant protection products are applied or not.** You must use either certified seed purchased from a licensed seed merchant or farm-saved seed produced on your own holding. **If your farm size is less than 12 ha in total**, please submit the return, but no payment is required. We may contact you for verification.
